

Amendments to the Claims:

The following Listing of Claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims

1. (Currently Amended) A melt processable composition comprising:
 - (a) one or more thermoplastic hydrocarbon polymers;
 - (b) a fluoropolymer processing aid having
 - (i) poly(oxyalkylene) polymer; and
 - (ii) a unimodal fluoropolymer having interpolymers of vinylidene fluoride and at least one other monomer wherein the vinylidene fluoride content of the fluoropolymer is greater than 75% by weight, and wherein said melt processable composition upon extrusion achieves an extrudate exhibiting no melt defects at a lower level of said fluoropolymer processing aid when compared to a standard processing aid system.
2. (Canceled)
3. (Original) The composition as recited in claim 1, wherein said fluoropolymer processing aid has a poly(oxyalkylene) polymer to fluoropolymer ratio of 1:1 or greater.
4. (Original) The composition as recited in claim 1, wherein said melt processable composition has a fluoropolymer content of 400 ppm or less.
5. (Original) The composition as recited in claim 1, further comprising: light stabilizers, antioxidants, antiblocking agents, slip agents, lubricants, fillers, flame retardants, foaming agents, nucleating agents, clarifying agents, colorants, coupling agents, compatibilizers, antistatic agents, antifogging agents, heat stabilizers, plasticizers, reinforcing agents, metal scavengers, acid/base scavengers, biocides or combinations thereof.
6. (Original) The composition as recited in claim 1, wherein the fluoropolymer is a thermoplastic polymer.

7. (Currently Amended) A melt processable composition comprising:
- (a) one or more thermoplastic hydrocarbon polymers;
 - (b) a fluoropolymer processing aid having:
 - (i) poly(oxyalkylene) polymer; and
 - (ii) a unimodal fluoropolymer having interpolymerized units of vinylidene fluoride and at least one other monomer, wherein the vinylidene fluoride content of the fluoropolymer is greater than 85% by weight, and wherein said melt processable composition upon extrusion achieves an extrudate exhibiting no melt defects at a lower level of said fluoropolymer processing aid when compared to a standard processing aid system.
8. (Original) The composition as recited in claim 7, wherein said fluoropolymer processing aid has a poly(oxyalkylene) polymer to fluoropolymer ratio of 1:1 or greater.
9. (Original) The composition as recited in claim 7, wherein said melt processable composition has a fluoropolymer content of 400 ppm or less.
10. (Currently Amended) A melt processable composition comprising:
- (a) one or more thermoplastic hydrocarbon polymers;
 - (b) a fluoropolymer processing aid having:
 - (i) poly(oxyalkylene) polymer; and
 - (ii) a unimodal fluoropolymer having interpolymerized units of vinylidene fluoride and at least one other monomer wherein the vinylidene fluoride content of the fluoropolymer is greater than 75% by weight and the amount of fluoropolymer in the melt processable composition is less than 200 ppm.
11. (Canceled)
12. (Original) The composition as recited in claim 10, wherein said fluoropolymer processing aid has a poly(oxyalkylene) polymer to fluoropolymer ratio of 1:1 or greater.

13. (Original) The composition as recited in claim 10, further comprising light stabilizers, antioxidants, antiblocking agents, slip agents, lubricants, fillers, flame retardants, foaming agents, nucleating agents, clarifying agents, colorants, coupling agents, compatibilizers, antistatic agents, antifogging agents, heat stabilizers, plasticizers, reinforcing agents, metal scavengers, acid/base scavengers, biocides or combinations thereof.

14. (Original) The composition as recited in claim 10, wherein the fluoropolymer is a thermoplastic polymer.

15. (Currently Amended) A fluoropolymer processing aid comprising:

(a) poly(oxyalkylene) polymer; and

(b) a unimodal fluoropolymer having interpolymerized units of vinylidene fluoride and at least one other monomer wherein the vinylidene fluoride content of the fluoropolymer is greater than 75% by weight, and wherein fluoropolymer processing aid when added to a melt processable composition, achieves an extrudate exhibiting no melt defects at a lower level of fluoropolymer processing aid when compared to a standard processing aid system.

16. (Currently Amended) The composition as recited in claim 15, wherein the fluoropolymer is a [a] thermoplastic copolymer and the vinylidene fluoride content of the fluoropolymer is greater than 85% by weight.
